Made of stainless Steel with high resistance to corrosion and scratches

Light power 18W

Voltage/Frequency: 230 V – 50 HZ

Dimensions: 200 h x 465 w x 170 d (mm)

Coverage: 25 m²

Consumable: one tube of 18 W

Weight: 2,5 Kg

Includes: Screws, electrical connection cable, chain for suspended position and one 18W tube.

DETAILS

This decorative EIK fly light comes in stainless steel and under request can be colour made tailored. It is shaped like a v and hides the caught flies from sight on an adhesive glue board. Place these traps about 2 or 3 meters above the floor, away from competing lights. Use the EIK in a variety of locations where flies are a problem, such as kitchens, restaurants, deli's, bakeries, hospitals, laboratory, working areas and offices. It is important to place these traps away from a window. It will kill flies effectively up to 25 m².
